Harvey: Yes ma'am!

Audrey: (While the ball is rolling) I'll get the ball!

(When Audrey returned)

Teacher: Ok, what have you observed as the ball rolls on the ground?

Ace: The ball keeps rolling on the ground.

Teacher: Of course the ball will roll but the true concept is that when you roll the ball on the pavement you did exert a contact force since your hands were in contact with the ball before you released the ball.

Scene 6: In the classroom

Teacher: Take a look at this one. (Pointing to the magnet and iron filings)

Audrey: What are we going to do to those materials?

Teacher: Try to put the magnet near the iron filings.
(One of the students will do the said activity)

Teacher: What have you noticed?

Clarence: The iron filings were attracted by the magnet.

Audrey: What is the explanation for that ma'am?

Teacher: The pull of gravity is a force that might set an object in motion. Did you learn something? If yes, can you make your own activity now related to that topic?

All: Yes ma'am, we can.
